VINEYARD AND CULTIVATION

VINEYARD

La Rendeja

DESCRIPTION

Within the municipal boundaries of Pesquera de Duero, facing south at an altitude of more than 800 metres.

SOIL

Limestone soil, with its characteristic white colour. Limestone soils have low fertility but the presence of clay and silt enables them to hold more water. These two characteristics complement each other to obtain optimal ripening with yields suited to the qualitative needs of the grapes.

CLIMATE

Very harsh, long and cold winters, and short, dry and hot summers. The 2018 was rated "Very Good" by the Regulatory Board of the Ribera del Duero Designation of Origin and the Extraordinary Committee on Harvest Assessment.

AGEING

Aged for 28 months in American oak barrels.
